

Marketplace Platform – Founder Requirements

Version 1.0

PART 4

SECTION 17 – ADMIN PANEL

17.1 Administrator Dashboard

Priority: ● Mandatory

Category: Administration

Requirement

The platform must include a secure Administrator Dashboard providing an overview of the entire marketplace.

The dashboard should display key platform statistics, including:

- Total users
 - Total Hosts
 - Total Companies
 - Active listings
 - Pending approvals
 - Bookings
 - Revenue statistics (where applicable)
 - Reported users
 - Reported listings
-

17.2 User Management

Priority: ● Mandatory

Category: Administration

Requirement

The Administrator must be able to:

- View users
- Search users

- Filter users
 - Suspend users
 - Reactivate users
 - Permanently disable accounts where necessary
 - View verification status
-

17.3 Listing Management

Priority: ● Mandatory

Category: Administration

Requirement

The Administrator must be able to:

- View all listings
 - Approve listings
 - Reject listings
 - Suspend listings
 - Remove listings
 - Edit listings when necessary
-

17.4 Experience Management

Priority: ● Mandatory

Category: Administration

Requirement

The Administrator must be able to approve, reject, suspend and remove experience listings.

17.5 Service Management

Priority: ● Mandatory

Category: Administration

Requirement

The Administrator must be able to approve, reject, suspend and remove service listings.

17.6 Verification Management

Priority: ● Mandatory

Category: Administration

Requirement

The Administrator must be able to review:

- Identity verification
 - Company verification
 - Tourism permit numbers
 - Supporting documentation
-

17.7 Report Management

Priority: ● Mandatory

Category: Administration

Requirement

The Administrator must be able to review reports submitted by users relating to:

- Listings
 - Messages
 - Reviews
 - Hosts
 - Guests
 - Companies
-

17.8 Platform Configuration

Priority: ● Mandatory

Category: Administration

Requirement

The Administrator must be able to manage platform settings without requiring software changes wherever practical.

Examples include:

- Languages
- Currencies

- Amenities
 - Property types
 - Experience categories
 - Service categories
 - Supported countries
 - Booking settings
-

SECTION 18 – NOTIFICATIONS

18.1 Email Notifications

Priority:  Mandatory

Requirement

The platform must send email notifications for important account and booking events.

18.2 Push Notifications

Priority:  Recommended

Requirement

The mobile applications should support push notifications.

Examples include:

- Booking requests
 - Booking confirmations
 - Booking cancellations
 - New messages
 - Reviews
 - Account updates
-

18.3 Notification Preferences

Priority:  Mandatory

Requirement

Users must be able to manage their notification preferences.

Where possible, users should be able to choose which notifications they receive.

SECTION 19 – SECURITY

19.1 Secure Connections

Priority:  Mandatory

Category: Security

Requirement

All communication between users and the platform must be encrypted using HTTPS/TLS.

Unencrypted connections must not be permitted.

19.2 Sensitive Data Encryption

Priority:  Mandatory

Requirement

Sensitive personal information must be encrypted using strong encryption standards such as AES-256 or an equivalent modern standard.

Examples include:

- Passport numbers
 - National identity numbers
 - Government-issued identification documents
-

19.3 Password Security

Priority:  Mandatory

Requirement

Passwords must be securely hashed.

Administrators must never be able to view user passwords.

19.4 Two-Factor Authentication (2FA)

Priority:  Recommended

Requirement

Two-Factor Authentication should be available for:

- Administrator accounts
- Host accounts
- Company accounts

The Administrator should also be able to require 2FA for selected account types.

19.5 Public Identifiers

Priority:  Mandatory

Requirement

Public URLs for bookings, listings and user resources must not expose sequential database IDs.

Public-facing identifiers should use UUIDs or an equivalent secure identifier.

19.6 Infrastructure Protection

Priority:  Recommended

Requirement

The platform should be protected by a Content Delivery Network (CDN) and DDoS protection service, such as Cloudflare or an equivalent solution.

19.7 Login Protection

Priority:  Mandatory

Requirement

The platform must include protection against repeated failed login attempts.

Examples include:

- Temporary account lockout
 - Rate limiting
 - CAPTCHA where appropriate
-

19.8 Session Management

Priority:  Mandatory

Requirement

Users must be securely logged out after an appropriate period of inactivity.

Users must also be able to manually log out from all active sessions.

19.9 Audit Logs

Priority:  Recommended

Requirement

The platform should maintain administrative audit logs recording important administrator actions.

SECTION 20 – FRAUD PREVENTION

20.1 Duplicate Listings

Priority:  Mandatory

Requirement

The Administrator should be able to detect and investigate duplicate property listings.

20.2 Suspicious Activity

Priority:  Mandatory

Requirement

The platform should monitor suspicious activity, including unusual login behaviour, repeated booking abuse and fraudulent account creation.

20.3 Account Suspension

Priority:  Mandatory

Requirement

The Administrator must be able to temporarily suspend accounts suspected of fraud while an investigation is carried out.

20.4 Reporting

Priority: ● Mandatory

Requirement

Users must be able to report:

- Fraud
 - Scam attempts
 - Fake listings
 - Fake profiles
 - Inappropriate behaviour
-

SECTION 21 – MOBILE APPLICATIONS

21.1 Supported Platforms

Priority: ● Mandatory

Requirement

The platform must support:

- Web
- Android
- iOS

The user experience should remain consistent across all supported platforms.

21.2 Sign In

Priority: ● Mandatory

Requirement

Where third-party sign-in providers are offered within the iOS application, Apple Sign In must also be supported where required by Apple's App Store Review Guidelines.

21.3 Deep Linking

Priority: ● Recommended

Requirement

The website should be capable of opening the installed mobile application directly when available.

Where the application is not installed, users should be redirected to the appropriate application store.

21.4 App Updates

Priority: ● Mandatory

Requirement

The platform should be designed so that future application updates can introduce new functionality without requiring major redesign of the platform architecture.

SECTION 22 – INTERNATIONALISATION

22.1 Multiple Languages

Priority: ● Mandatory

Requirement

The platform must support multiple languages.

The Administrator should be able to introduce additional languages in future releases.

22.2 Multiple Currencies

Priority: ● Mandatory

Requirement

The platform must support multiple currencies.

Users should be able to select their preferred currency.

22.3 Country Availability

Priority:  Mandatory

Requirement

The Administrator must be able to enable or disable supported countries from the administration panel.

22.4 Country-Specific Compliance

Priority:  Country Specific

Requirement

The platform should support country-specific requirements, including tourism permit numbers and other regulatory fields where legally required.

SECTION 23 – PERFORMANCE & ACCESSIBILITY

23.1 Performance

Priority:  Mandatory

Requirement

The platform should provide a fast and responsive user experience across desktop and mobile devices.

23.2 Accessibility

Priority:  Recommended

Requirement

The platform should be designed with accessibility in mind so it can be used by people with disabilities where reasonably practicable.

23.3 Responsive Design

Priority:  Mandatory

Requirement

All pages must function correctly on desktop computers, tablets and mobile devices.

SECTION 24 – LAUNCH REQUIREMENTS

24.1 Production Readiness

Priority: ● Mandatory

Requirement

Before launch, all core marketplace functionality must be tested and verified.

24.2 Backup Strategy

Priority: ● Mandatory

Requirement

The platform must include secure and regular backups of critical platform data.

24.3 Error Logging

Priority: ● Mandatory

Requirement

The platform must maintain application error logs to assist with troubleshooting and maintenance.

24.4 Monitoring

Priority: ● Recommended

Requirement

The platform should include monitoring tools capable of identifying outages or critical system failures.

SECTION 25 – FINAL FOUNDER CHECKLIST

Before launch, the platform must support:

- Accommodation marketplace
- Experiences marketplace
- Services marketplace
- Manual Host approval
- Manual Company approval
- Property approval workflow
- Secure user registration
- Email verification
- Phone verification where required
- Hidden property addresses
- Approximate public map locations
- Multiple currencies
- Multiple languages
- Secure bookings
- Secure online payments and optional pay-on-arrival
- Internal messaging
- Guest reviews
- Host reviews
- Security deposits (if enabled)
- Administrator dashboard
- Fraud reporting
- Secure encryption of sensitive personal information
- HTTPS/TLS encryption
- UUID-based public identifiers
- Strong password hashing
- Responsive web platform
- Android application
- iOS application
- "Open App" functionality
- Apple Sign In support where required for iOS
- Country-specific compliance options
- Future scalability for additional countries, languages and marketplace features
